9U1RU Burundi -update November 4

We have now been QRV for 4.5 days running up to 10 HP stations 6m – 160m. Per our 9U1RU Club Log Expedition [chart](#) we are currently at 43,500 QSOs from this mountainside QTH 2,340m ASL. Please know that we are still experiencing electrical power issues and outages even with the addition of generators. For this reason, we encourage you to check ClubLog to see if you are in the log. We know some QSOs have not been completed as these power outages occur... so please work us again. Last night we had a good FT8 run on 80m and on 160m good results to EU while not so favorable conditions to NA. We will continue to optimize our beverage RX system as well as the verticals on TX. <https://www.dx-world.net/9u1ru-burundi-dxpedition/>

9L9L Banana Island -update November 4

QRV since 1345z yesterday, **9L9L** continues to be very active on 40-20-17m, CW & FT8. We recently received on island pictures and posted on Facebook (embedded below). A reminder that several landing teams, each consisting of two operators, will rotate from the island and stay for three days and two nights at a time.

CY0S Sable Island -update

The Sable Island CY0S DXpedition team is very pleased to announce the addition of Ralph Fedor K0IR to the team. Ralph is in the DX Hall of Fame and holds ten "DXpedition of the Year" awards. The CY0S team is very excited about Ralph joining our effort scheduled for March 19-31, 2026. Ralph has activated some of the most remote and inhospitable places on earth. His bio is on the CY0S [website](#).

Mission accomplished! The team has wrapped up an unforgettable experience in one of the Top 50 Most Wanted countries. The DXpedition has officially come to an end! Cabin is rented and has an excellent location and free space to erect antennas. First signals planned around 2000z on Sunday 9th Nov. The team is in very good spirits and hope to log many stations in different bands and modes.

VU7R Lakshadweep -update

We are pleased to announce that we will be activating Agatti Island in Lakshadweep. We expect to receive the permits next week, and preparations are already well underway.

To make this activation a success, we kindly request your support. There are significant expenses, including accommodation, equipment transport, and import costs. Additionally, we will need to keep the station's generators running for 13 days. Every dollar you contribute will greatly help the team during the preparation phase. Thank you in advance for your generosity and support

Donations can be made via PayPal to info@sreetek.com. Your contribution will help the team cover costs and make this expedition a success. <https://www.vu2rs.com/vu7r/>

FW5K Wallis & Futuna -now QRT

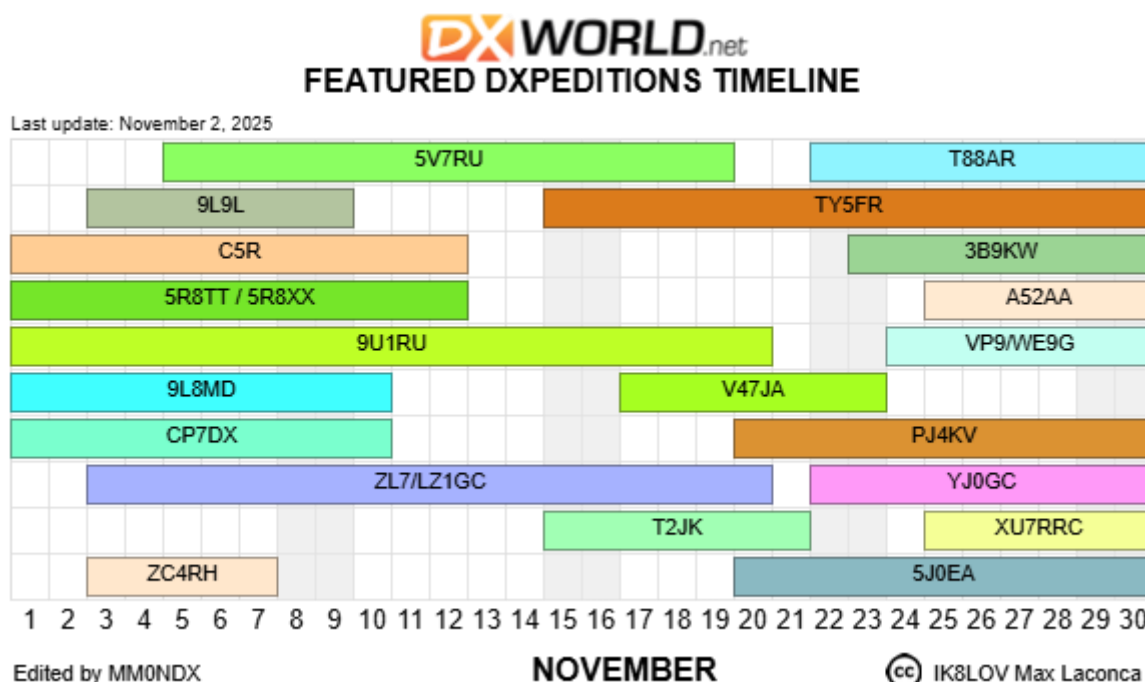

FW5K & FW1NA are QRT earlier than planned. During the last 40m CW run the SPE Expert PA died. It is very disappointing that this happened on last day, says Alex K6VHF. Over 40,000 QSOs logged.

5J0EA San Andres Island -update

We now have our personal licenses and the authorization to use the callsign 5J0EA. We would like to thank the Bogotá Amateur Radio League for their invaluable help. V6, MICRONESIA as V6CW

V7, MARSHALL ISL as V73RK

T30, WESTERN KIRIBATI as T30RK

Chances of finding an affordable HF location on the islands are very limited. The prices per night are exorbitant like in the Caribbean and an S9 QRM level is guaranteed on most locations.

Therefore, I will also operate portable or out of a car. The advantage is having a good location near the sea, but the disadvantage is that I have to build up and take down my antennas every day... That is why my operation will not be 24/7... It will be a mixture of DXpedition, antenna experimenting and meeting local radio amateurs. Yes, I will try the low bands and of course 60m CW, where allowed. I'm looking forward to meeting you! Every QSO will be "hand made" with an ETM9c keyer – it will be an old school DXpedition.' <https://www.roody.de/>

The island is located in the south central part of Chile, about 550 km south of Santiago, Administratively, it belongs to the municipality of Coronel in the Bio Bio region, but is located a few dozen kilometers away on the Pacific Ocean that separates it from the mainland. Nearly 2,200 people live in its lush vegetation, wetlands, cliffs, and sandy beaches, inhabited by the Mapuche before Spanish colonization. There are no roads, no heavy vehicular traffic, and no industrial pollution from the cities. Only artisanal fishing and subsistence farming exist.
